

PAMPER YOUR BODY AND SPIRIT

We are currently in the midst of a real "spa-mania". And all of us, at some point, need to take some time out just for ourselves, to relax, reflect and recover our energy and vitality. Meliá Sancti Petri's Beauty Farm is a unique place where you can get into shape, play sports, and just relax and re-energize, far from the pressures of everyday life, while our staff take care of you with treatments based on the thermal and massage properties of non-medicinal baths.

Alternating swimming pools and seawater improves the circulatory system and tones the body. Bubbles and hydrotherapy reduce tension and relax muscles. Saunas help eliminate toxins and cleanse the respiratory system. Massages help fight cellulite and improve venous return while relaxing the body. All this and more is available at the Beauty Farm, in incomparable surroundings to be enjoyed with family and friends.

Our methodology is based on an optical diagnosis of the skin and the use of active substances, bio-enzymes, and regenerating, calming and homeopathic peels to dynamize and enhance our treatments, obtaining the desired effects.

Our professionals offer subtle, energetic massages using oils, essences and frozen oligoelements, especially in summer. We stimulate the skin through an increase in circulation to rejuvenate and recover its balance and beauty. Additional options include body wraps using mud, seaweed, paraffin and parafango (mud and paraffin), as well as enzyme body masks.

We have taken the utmost care to make your visit to the Beauty Farm enjoyable. We use all the latest techniques, and are always looking for new ways to satisfy our clientele. Such techniques include Endermologie LPG treatments, American Body treatments, and slimming body wraps that show results right from the very first session.

In our Neokit "cocoon" facility, you can take a Turkish bath, a Vichy shower on a vibrating table, or a bath with jets of water streaming to your back, waist, legs and the soles of your feet, and then enjoy a state-of-the-art artificial solarium.

We offer waxing treatments using green aloe vera or sea products according to the skin types and specific needs of our clientele. In nail care, we always use the most exclusive brands with the latest colours of the season, along with frosted, gold, silver or shiny finishes. And our makeup services incorporate the latest techniques from Jorge de la Garza.

One of our special treatments is wine therapy. We use the innovative products found in Bruno Vassari's "Kianty Experience" line, which incorporate a mixture of grapeseed polyphenols and vitamin E to stabilize the structure of cutaneous proteins. Vitamin E penetrates the skin, down to the layer requiring the highest concentration of antioxidants, and hydrates and increases the activity of enzymes in the cutaneous tissue.

The final touch: our hair salon. We use Tigi and Revlon styling aids and accessories, as well as Indola colouring products. We can also offer ten-minute permanents using the Ozonomatic, the machine that has revolutionized the world of hairdressing.

"ESCAPE" TREATMENTS
